Summary:

I'm passionate about learning the latest and greatest technologies whether that's the frontend or backend. I enjoy creating sleek and responsive applications in addition to being user friendly. I love working in fast paced environments. With a highly diverse educational background and cultural experiences I excel at collaborating with teams of different knowledge sets.

A versatile engineer with interests in Software Engineering and Machine Automation. Adaptable and self motivated learner. Interested in new programming technologies, and continuous self improvement, with knowledge of Business and financial modelling in Start-up environments. Able to lead, manage and recruit people and with remote work experience.

Design Thinking

Problem Solving / Logical thinking
